All forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by this cautionary statement. We are under no duty or obligation to update any of the forward-looking statements after the date of this annual report.

PART I**Item 1. Business.****Introduction**

We are a leading broadband connectivity company and cable operator serving more than 31 million customers in 41 states through our Spectrum brand. Over an advanced high-capacity, two-way telecommunications network, we offer a full range of state-of-the-art residential and business services including Spectrum Internet, TV, Mobile and Voice. For small and medium-sized companies, Spectrum Business® delivers the same suite of broadband products and services coupled with special features and applications to enhance productivity, while for larger businesses and government entities, Spectrum Enterprise provides highly customized, fiber-based solutions. Spectrum Reach® delivers tailored advertising and production for the modern media landscape. We also distribute award-winning news coverage, sports and high-quality original programming to our customers through Spectrum Networks and Spectrum Originals.

Our network, which we own and operate, passes over 53 million households and small and medium businesses ("SMBs") across the United States. Our core strategy is to use our network to deliver high quality products at competitive prices, combined with outstanding customer service. This strategy, combined with simple, easy to understand pricing and packaging, is central to our goal of growing our customer base while selling more of our core connectivity services, which include both fixed and mobile Internet, video and voice services, to each individual customer. We execute this strategy by managing our operations in a consumer-friendly, efficient and cost-effective manner. Our operating strategy includes insourcing nearly all of our customer care and field operations workforces, which results in higher quality service delivery. While an insourced operating model can increase the field operations and customer care costs associated with individual service transactions, the higher quality nature of insourced labor service transactions significantly reduces the volume of service transactions per customer, more than offsetting the higher investment made in each insourced service transaction. As we reduce the number of service transactions and recurring costs per customer relationship, we continue to provide our customers with products and prices that we believe provide more value than what our competitors offer. The combination of offering high quality, competitively priced products and outstanding service, allows us to both increase the number of customers we serve over our fully deployed network, and to increase the number of products we sell to each customer. This combination also reduces the number of service transactions we perform per relationship, yielding higher customer satisfaction and lower customer churn, resulting in lower costs to acquire and serve customers and greater profitability.

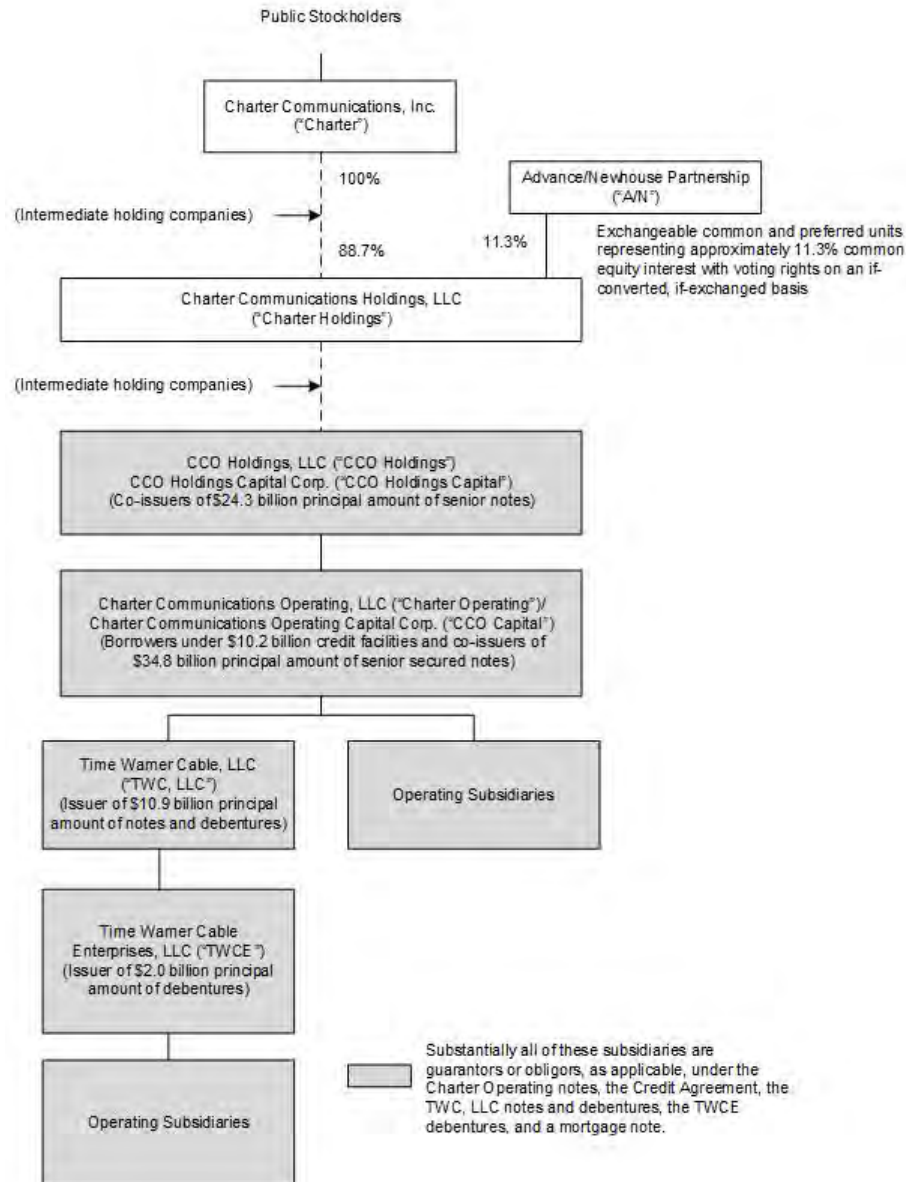

We have enhanced our service operations to allow our customers to (1) more frequently interact with us through our customer website and My Spectrum application, online chat and social media, (2) have their services installed at the time and in the manner of their own choosing, including self-installation, and (3) receive a variety of video packages on an increasing number of connected devices including those owned by us and those owned by the customer. By offering our customers growing levels of choices in how they receive and install their services and how they interact with us, we are driving higher overall levels of customer satisfaction and reducing our operating costs and capital expenditures per customer relationship. Ultimately, our operating strategy enables us to offer high quality, competitively priced services profitably, while continuing to invest in new products and services.

The capability and functionality of our network continues to grow in a number of areas, especially with respect to wireless connectivity. Our Internet service offers consumers the ability to wirelessly connect to our network using WiFi technology. We estimate that approximately 400 million devices are wirelessly connected to our network through WiFi. In addition, we extend Internet connectivity to our customers beyond the home via our Spectrum Mobile product through our mobile virtual network operator ("MVNO") reseller agreement with Verizon Communications Inc. ("Verizon"). In 2020, we purchased 210 Citizens Broadband Radio Service ("CBRS") Priority Access Licenses ("PALs") within our footprint from the Federal Communications Commission ("FCC"). We intend to use the licenses along with unlicensed CBRS spectrum to build our own fifth generation ("5G") mobile network which we plan to use in combination with our MVNO and WiFi network to enhance our customer's experience and improve our cost structure.

Our principal executive offices are located at 400 Atlantic Street, Stamford, Connecticut 06901. Our telephone number is (203) 905-7801, and we have a website accessible at www.corporate.charter.com. Products and Services

We offer our customers subscription-based Internet services, video services, and mobile and voice services. Our services are offered to residential and commercial customers on a subscription basis, with prices and related charges based on the types of service selected, whether the services are sold as a “bundle” or on an individual basis, and based on the equipment necessary to receive our services. Bundled services are available to substantially all of our passings, and approximately 56% of our residential customers subscribe to a bundle of services including some combination of our Internet, video and/or voice products.
